

## KJ4JC Earns Master's Degree Award

**MASTER**  
**#29**

It took me 3 yrs and 1 month not counting 160 meters because it wasn't used for my Masters Degree. I started 75 meters

At first I worked all nets and just made as many contacts as I could and didn't really pay attention to what I was getting, but did pay attention sometimes to what others seemed to be important and worked what all the other stations were working sometimes.

Like I said, if I was here I would work the early net, and after it was over then I would check into late net. After a while I started doing NCS so I could get even more contacts, <that really helped>. I got lots of pointers from Nadine, WA0SMQ, KM5MS and also a lot of help from a great ham WB5FDP. Rick has been very nice putting up with me, getting me set up on clogger and helping me create reports along to help keep track of certain things like YL's, DX, etc. 73 randy KJ4JC

Masters Degree #29 plaque proudly displayed at the radio shack of KJ4JC.

# Final Election Results

Voting has concluded and *NJ9T*, *John Thornton* has been re-elected as our *President* to serve for another two-year term. The complete results are as follows:

<b>2nd Area Director:</b>	<b>N2XTT</b>	<b>Peter</b>	<b>12 votes</b>	<b>ELECTED</b>
<b>3rd Area Director:</b>	<b>N3WD</b>	<b>Bill</b>	<b>17 votes</b>	<b>ELECTED</b>
	N3YK	Bob	8 votes	
<b>4th Area Director:</b>	<b>NC4RS</b>	<b>Ron</b>	<b>33 votes</b>	<b>ELECTED</b>
	K6CRA	Phil	13 votes	
	KE4DYG	Robert	7 votes	
	AJ4RK	Rusty	6 votes	
<b>6th Area Director:</b>	<b>WA6HZE</b>	<b>Ray</b>	<b>9 votes</b>	<b>ELECTED</b>
<b>8th Area Director:</b>	<b>W8JMF</b>	<b>John</b>	<b>7 votes</b>	<b>ELECTED</b>
	WM8V	John	6 votes	
	N2OCW	Larry	5 votes	
<b>10th Area Director:</b>	<b>N0PUI</b>	<b>Jay</b>	<b>16 votes</b>	<b>ELECTED</b>
	WT0A	Glen	14 votes	
<b>President:</b>	<b>NJ9T</b>	<b>John</b>	<b>149 votes</b>	<b>ELECTED</b>
	N7XG	Dean	101 votes	

All offices are for a two-year term beginning 1 March 2008, except the 3rd Area Director who takes office immediately to fill the un-expired current term. The 3rd Area Director position will be up for election again in December 2008 along with the other odd-numbered call area director positions.

## First President of the 3905 Century Club Howie Gould W9HG SK

***W9HG - Howie Gould  
1931 - Jan 4, 2008  
Founder of the 3905 Century  
Club, Inc. & First Club President***

*Born in South Boston in 1931, I always had a fascination for radio from the time I was able to walk and talk. My folks had an old radio that sat on a table in the living room that we listened to every evening that had an open type back of the cabinet exposing the tubes and their signal grid leads and the tubes had a orange glow and a slight feeling of heat coming off them that attracted me to investigate and poke fingers at. I remember one time putting my finger on a lead to one of the tube grid caps and the station we were listening to blasted in, that was my first contact with radio and I have been at it ever since.*

*I remember another embarrassing moment in time when I was in High School and had purchased my first what they called a 2-way portable radio that used A and B batteries and also plugged into A/C. Having no money to purchase new batteries when the battery voltage dropped I decided to charge the batteries by way of 120V A/C, that was my first encounter with DC and AC voltages which resulted in a smoking radio and it was then I decided to learn about electricity and Ohm's law and this eventually led to Ham Radio and an electronics career with a commercial radio and TV manufacturer. Being a tinkerer at heart Ham Radio became a natural for me and stepped me into many wiring and building projects through the ensuing years that followed me into the early days of analog circuits.*

*I have been involved with public service, handling of phone patches in the sixties from the Antarctica for our military guys and gals, founded The 3905 Century Club (Feb 1977) and was one of the first officers for ECARS. I also am a member of the A1 Operator Club.*

*I served my country during the Korean War as a Marine and I serve now as a MARS Air Force operator with the call sign AFA2JI.*

*I especially enjoy making wire antennas of all sorts and talking on both phone and CW. I have some digital interests but being as I am from the old school of analog circuitry and hand wired radios where you could actually find the exact one part that was defective versus changing out a block of components contained in today's digital chips which hold a ton of components and circuitry, I am thoroughly satisfied with good old radio. Ham Radio has been a good hobby for me as it has given me a chance to meet many people from all walks of life and sometimes be able to meet and help those along the way who are stumbling through their early phase of learning the radio art.*

*I was first licensed as a Novice class in 1955 and I have held the calls KN1HHN, K1HHN, W4NVF, and my present call W9HG so as to personalize and associate it with my name. I also passed the Extra in 1993 doing a blazing 20 wpm solid copy on the full text, a skill I am deeply proud of since it is only a memory of a skill to be cherished now that they have dropped the Morse code for an open road to an unearned Extra Class and I still don't get it. I am a certified VE heading a group that has been active since 1993, and I thoroughly enjoy watching new faces come into the hobby and become part of our fraternity especially those who earned it.*

*Ham radio is entering a new and exciting era and I look forward to the new digital world that is being created which will renew interest in this old hobby of ours.*

*2007-04-20 Written and published on QRZ by Howie Gould, W9HG*

*KE4PD, Emory "Paul" Dillard SK*

*This is KE4PD, Alabama calling! Every ham has something a little unique when he or she keys up the radio. This is what I heard each time from KE4PD. KE4PD was one of those operators that was on the net every chance he had and worked everyone as time allowed. KE4PD you will be missed by many.*

*Jay L. Wieland  
Editor, Centurion*

**WA0SMQ Margret “Nadine” Hopson SK**

Offering a toaster for contacts made on the 160 Meter nets were a common comment nightly. Also the “Good Nights” to everyone at the end of the nets will sure to be missed.

I started with the 3905 Century Club Net in December of 1999. Nadine was there to help me get started and do things correctly. At that time Nadine was the 3905 Century Club 10th Area Awards Manager. Those awards had to be correct or they were coming back and Nadine would simply explain what I needed to do to correct any problems I had.

Nadine has been a valuable asset to the 3905 Century Club as the 160 Meter Net Coordinator. One could always count on her being on the net every night and either working as NCS or helping relay to make those contacts happen.

Nadine has also received many awards and recognition for her participation with the 3905 Century Club. Anyone that had worked her station received a QSL with many of her achievements listed on the back. Most recent is the #1 Poker Player Award on the 160 Meter Net.

*“Good Night Nadine Girl”  
You are sadly missed*

*Jay L. Wieland  
Editor, Centurion*

**K7BAA 7th Area Awards Manager SK**

Pete Larsen, known to the 3905 Century Club as K7BAA took his involvement to higher levels. Pete worked on making management of awards more simple for new hams by producing word templates. His work was also approved by the awards committee.

Pete was also one of our NCS stations and helped provide many members with contacts by running Rodeo Nights. Pete would actually laugh on the air as each had their turn and the contacts that were made.

Yet another operator that will be sadly missed by the membership of the 3905 Century Club.

Jay L. Wieland  
Centurion Editor

**Master Degree Holder #27 continued from page 3:**

My operating is principally with of a FT-1000 Mark V and a K2, and I generally run about 250-300 watts from an AL-811. I live in OKC on a ½ acre lot and have antenna restrictions, so I have used an 80 meter loop at 35' and a 40 meter V for most 3905 work. For 160 I ran 90' extensions on each leg of the 40 meter V along the top of a stockade fence at 5' to make the antenna resonant. It is deemed a “horizontal U”. I laughed too, but it worked well enough for the 100 point card and a WAS, so it proved almost anybody can get on 160.

My operating is principally with of a FT-1000 Mark V and a K2, and I generally run about 400-500 watts. The most challenging part of going for awards on 3905 for me was being patient in waiting for cards and expecting ALL others to responsibly send cards. Seems like there is just a small percentage that will not properly respond for some inexplicable reason . I bet these people don't pay their bills on time either. Some folks are just like that. I finally decided if I couldn't enjoy the 3905 experience that I should probably go do something else.

Working with others on the nets makes the whole process both more fun and productive. Also, I have enjoyed the many friendships I have made through 3905... 73 Paul, NN5G

# 7 A year in review from NJ9T President of the 3905 Century

Well our 30th year is about to end, so I thought I might take a look back. It was a good year and a sad year and we will look at both.

On the good side membership has grown and we celebrated the club's 30th anniversary. We started with a contest for a 30 year logo, and what a great selection we had. It was hard to choose but Peter N2XTT had the top vote getter and what a wonderful job he did. We had two new Area Directors take office in March, Bob KC1AU in the 1st area and Bob KI7PM in the 7th area, both gentlemen have done a great job. Jim and Linda Richardson did a fantastic job with the Eyeball in Guthrie, OK, we had a great group of members in attendance. Bob KI7PM won the antenna shoot-out for the second year in a row, but the real show was Lon K0WJ with his plumbing supply special. For Lon it just wasn't his year, his antenna had some bugs that needed worked out, but there is next year. We did have a couple of new service awards that were given out this year, the first was the Pioneer Award, Roy K5WSC was the recipient. The second award was bittersweet, it was created in the memory of Gordon Love K7MFG who became a SK this year. The award was The K7MFG Net Control of the Year, and award that will be presented to members that perform NCS on all the different nets. Rick WB5FDP was given this award, good job Rick. Our KD3FM Award was given to two outstanding members, first was Jimmy N5UJB our 5th Area Director

for his years of service and leadership to the club. The other was given to Jack WN5M for his work and dedication to the club.

Let's move on to some other positives, what wonderful NCS we have, our nets are operating even with the bad conditions we have experienced this year. Some think that all NCS and all nets should operate exactly the same, but I personally like the personality that each NCS puts into each net they do. If we want them all exactly the same, we should come up with a computer program to do NCS, and I find that boring. To some of the older members, remember Carol's 75 meter nets, they were just plain fun. I would like to thank all our Net Coordinators and NCS for the excellent jobs you have done this pass year, this would not happen without you.

Let's move onto the reason we have the nets, working for our awards. I would like to thank all the Area Awards Managers for checking all of the awards, also to Jack, WN5M, Bill WM4SG and Mike KC8MMZ for processing the awards putting them into the data base, printing and mailing the awards. I would like to really thank Jack and Bill for creating the new awards system, with the speed of processing and gorgeous awards produced. We also voted in two new Masters this year, Mike NC4MO and JR WU8Q, congratulations guys. When talking about awards, let's not forget our Awards Committee, for creating our new awards and

updating others, great job guys.

Now let's move into an area that I am most proud of and that is our membership, it is more that just sending signal reports. I have found that great friendships are created from our nets, just listen to the nets. We are all friends, whether we have had the chance to meet eye to eye or just on the nets, we are all friends. The part of our annual Eyeball that I dislike is leaving on Sunday mornings, as there is usually a good size group that just do not want to leave, and then can't wait until the next year to see everyone again. The 2008 Eyeball will be held in PA, and I am counting the days.

I am waiting to see what happens between the MN/WI battle. Jay N0PUI got the best of Gene WM9H with the shrink-wrapping of Gene's car in OK. Gene you should not have told everyone that you put your dog Molly in the wrong car, I think this might come back to bite you. If you want to have fun while waiting your turn on the nets, get on Al VE4ABU's Chat Room, you will make new friends and get entertained at the same time, Thanks Al.

I would like to give a special thank you to the Presidential Advisory Board for all the help and support this last year. A big thanks to Howie W9HG in helping work out the negotiations with the group on 75 meters to secure a set start time and to get back to our 02:00 zulu start time.

Let's now discuss our Bu-

reaus, First Class all the way. Richard W5IL, Gene WM9H and Ron N9KNJ you gentlemen do a thank less job and you do it so well. I have seen Gene's bureau in operation, and it staggers the mind, and Richard spends most of his time at the Eyeball sorting cards. Again gentleman a job well done.

Now let's look at the bad things that have happened this year. Number one is the poor band conditions were are having at the bottom of this solar cycle, but we have worked through it the best we can. The worse thing to happen this year was to lose some of our members and the suffering others have had to go through with illness of themselves or family members. My prayers are and have been with you all along and will continue. We have all pulled together to help each other this past year, which brings me to my main point, we are just one big group of friends that have a great time together and will do just about anything for one another. With this attitude, we will be around for another 30 years.

I just have one thing left to say, Happy Holidays to all and have a very safe one, we want to keep you all around for a long time to come.

73, John (Pete) Thornton  
NJ9T  
3905 Century Club President

**What makes the 3905 Century Club Shine! Members come together to make it happen.  
KD4POJ/OX3PG Greenland**

First, want to thank Ron and our other buro managers for all their hard work for the club! They do a great job and one that I don't think they get enough thanks for. Richard, Gene and Ron do us all a great service and I think we all should give them a round of applause!

Second, I want to thank all the members that worked the Special Event Station, you all made it a great success! Over 2700 QSOs, WAS ssb on 20/40m a lot of this was because of the great response from the CCN membership. Thank you all.

Third, if you are not sure or didn't get the word, or might have thought that is was like some of our other SE's that come on the nets. This SE did require a QSL card either via the CCN buros or via a Direct SASE to OX3UR the SE QSL manager. So if you didn't send a card, you won't get a QSL for the Special Event Station OX60AD.

A note about this: All cards have and still are being donated to the Thule AB, Heritage Museum in a very nice Embossed Photo Album. The first Album was presented to the Group Commander and the folks of the Heritage Museum the week before I returned to the US. We had a nice little presentation and everyone was truly thankful for the great response and support of the 60th Birthday of the USAF and the 56 anniversary of Operation Blue Jay (building of Thule AB) and the Defense Treaty between the US, Denmark and Greenland Home Rule for the Protection of Greenland and North America.

Next, I would like to say thank you all for the great contacts with OX3PG and share with you some of the stats of OX3PG.

1. 113 DXCC worked
2. Two band WAS ssb on 20/40m.
3. WAE 53
4. WPX 1166 prefixes
5. IOTA 52 Islands
6. From the top to bottom of the world...worked R1F (Franz-Josef Land) to ZL4 (New Zealand). and worked all WAC except for Antarctica. I did hear them but just didn't have enough signal to reach the true bottom of the world.

On another topic, there have been a few folks that have not received a card from OX3PG. First let me ask that you first contact myself (KD4POJ AT SRT DOT

COM) . We have had a few that have staggered in from the buros and from the USPS after being mailed out months ago. Give me a little time to check things out. Let me also say we nor any manager has a way to find cards not received. Best course of action is first ask if I have received you card. If I, didn't please resend the card and we will get it out to you. Again I HAVE NO WAY to find a card that was lost, misdirected in either via the buros or USPS.

If I did get it and sent it out already, you might want to wait to see if it's in your next package of cards via the buros. The card might be in your SASE waiting for additional cards to fill your SASE be for it's sent out. So please ensure that you have at least received one to two packages of cards from either the WM9H or W5IL buros before making a request. This will save everyone time and resources.

In closing again I would like to thank Ron, Gene and Richard for the Exceptional work they do, and a Special Thanks to Nadine (WA0SMQ) for all the hard work, countless hours, and dealing with some otherwise difficult situations. Thanks Nadine for the hard work and your friendship!!! You are truly a treasure!

There is a few other members I want and need to thank. Jay N0PUI, Thanks for jumping in when we ran out of cards. Jay made up several hundred cards to hold us over till I got the new QSL printer onboard. Also Paul NN5G, who when my radio broke for the second time, loaned me his TS440 so that I could keep on the air. Additionally, Gene KG4NBL for not only designing the first QSL cards we used but paid for the first 500. Thanks Gene, your generosity, it is truly appreciated and will never be forgotten! To Peter, N2XTT, Bill KB0BK, and Jeff AL7QQ for their assistance in check in and relay support. An additional thank you to Peter and the students of LYNDHURST HIGH SCHOOL ARC for the wonderful graphics they did for the Special Event Station.

These and many other members of the club demonstrate time and time again how great the membership is of the 3905 Century Club. No wonder it's been going so strong for 30 years!

Best wishes to all

Dwayne  
KD4POJ  
ex OX3PG

**SANTA?**  
**GRANDPA?**  
**BURO MANAGER?**  
**WM9H?**

Remember Cassandra Jeanne Schneider, John <NJ9T> named her the official 2007 EYEBALL BABY. She will be 5 months on the 27th of Dec. Well here is a photo of her and I. I make a good Santa. Better then knowing where to put a dog.

This would be the part of that old song: **“Laughing all the way”**. When I left for the 2007 Eyeball in Guthrie Oklahoma a plan had been in the works for over a year, yes, since the Minnesota Eyeball of 2006. WM9H and NOPUI left for the Oklahoma Eyeball at the same time. Our paths did not cross until we reached Guthrie. Along the way I picked up AL7QQ who had rode down with me.

AL7QQ had no idea what was in the works. WM9H and NOPUI made contact on the hour on 7.178 all the way to Guthrie. Gene had reached Guthrie first and took a room for the weekend. AL7QQ and NOPUI reached Guthrie later that afternoon. I advised Jeff that I needed to take a tour of Guthrie but in fact was a search and decorate operation. We locate WM9H’s car in the downtown parking lot. No one was to be found when we pulled into the parking lot. I told Jeff I had something to do and pulled out my roll of three foot wide shrink wrap and the rest is history. Although upon completion of the operation the Motel owner was standing outside laughing with her arms crossed. The banker from across the street was standing outside on the front steps of the bank laughing also. As more operators arrived for the Eyeball, I continued to advise them on 7.178 to stop and see Gene’s new 1997 Chevrolet Lumina still wrapped in the package. Little to say and I quote NJ9T **“They don’t make those any-more”**. 2008 proves to be a banner year. Let the games begin. Laughing all the way.

 Centurion Editor

# **Eyeball 2008—Aug 1,2,3 Hanover, PA**

## **Hosted by Bill Dobson, N3WD**

The 2008 Century Club Eyeball will be held just south of Hanover, PA in Pleasant Hill, PA at the Pleasant Hill Volunteer Fire Company social hall and carnival grounds. The cost will be \$30 for adults and \$15 for children 12 and under. The official web page for the eyeball is at [www.n3wd.org](http://www.n3wd.org). I will keep it up to date.

The social hall is air conditioned and wheel chair accessible. The Saturday evening dinner will be provided by the fire company's ladies auxiliary. They will be serving from the kitchen and the hall is big enough to hold a couple hundred folks.

There will be camping and RV accessibility on the carnival grounds. ALL RV hook ups will have electric and some will have water. The fire company will be collecting a fee to hook up of \$25 the first night and \$20 each night after. As of this time we will have space available for folks to pitch a tent if they wish. A bathroom is available, but NO shower facilities exists at this time. I am working with the fire hall to see if the showers in the actual fire hall can be made available during certain times.

Hotels will be at a premium since Hanover is the overflow for Gettysburg. Book early for rooms. I have worked with 5 hotels/motels for accommodations and have listed many more on my web page.

This years eyeball site is only 1.4 miles from the Maryland/Pennsylvania state line. There is a shoulder on both sides that about 5 vehicles could pull off on each

side. The QRP nets should be more than able to work folks on the state line. Also, the Pennsylvania state capital of Harrisburg is less than an hour away.

There are plenty of things for folks to do before or after the eyeball. Gettysburg is just 20 minutes away for those who are history buffs. The National Shrine Grotto of Lady of Lourdes is about 40 minutes away. If you visit the Grotto you really need to stop and have lunch at the Cozy Inn in Thurmont, MD. This little Inn has seen many presidents and celebrities over the years because of it's proximity to Camp David.

Antietam Nation Battlefield, Hershey Park, PA Dutch Country, Baltimore and Washington, DC are close by. Also, for those football fans the Baltimore Ravens training camp is less that 20 minutes from the eyeball site in Westminster, MD.

If you have never been to the Mid-Atlantic area I really suggest making it a vacation and spend a few extra days in the area.

As of this time we are frantically working on getting some really nice door prizes for this years event. I am fortunate to be the treasurer of the Baltimore ARC and we hold a hamfest in late March. I am working on some deals with some of our vendors for door prizes. The more folks that sign up early the better the prizes. There will also be a special prize drawing for those that sign up by April 1.

As of right now we will

have a Ten-Tec Paragon and a Ten-Tec Jupiter as the operating stations with an Ameritron AL-811 amp and a second amp which is tbd. The antennas at this time will be a vertical for 40 on top of a 40 foot mobile tower. The 80 meter station will have a Carolina Window for now. Don't be surprised if the 80 meter station is moved outside and we us a 132 foot vertical long wire raise by a weather balloon. The Hanover Area Hamming Association holds field day there and this antenna has been gang busters.

The current schedule of events are as follows:

Thursday—12 noon will be antenna/tower set up.

3PM Registration will begin

4PM 40M SSB QRP net

7:30 PM 40M SSB Net

10PM 75M SSB Net

Friday— 9AM Registration Begins

1PM Forum—Topic TBD

3PM BOD meeting

5PM 75 SSB QRP Net

7:30PM 40M SSB Net

10PM 75M SSB Net

Saturday—7:30AM Breakfast served by Fire Company. There will be a cost for this.

9AM—Antenna Shootout on the carnival grounds. Even the big rigs can participate.

2PM—Awards Ceremony

3:30PM Door Prizes

5:30PM Dinner (Part of Eyeball)

7:30PM—Bingo

7:30PM 40M SSB Net

10:00 PM 75M SSB Net

Sunday—8AM Breakfast cost \$5 at the Carnival Grounds

9AM—Clean Up

12 Noon Goodbyes

Also there is an Eyeball QSL Card design contest with a prize. See [www.n3wd.org](http://www.n3wd.org) for details. We have received some really great entries so far and a card design will be chosen in March.

Eyeball tee-shirts will be available. N3DUH, Patricia Dobson a Fine Arts major will be designing the shirt. As soon as a cost is known information will be posted on my web page.

**SPECIAL NOTICE—**

Anyone who will be coming in early please be advised that the Fire Company's annual carnival runs through the Saturday of the week prior to the eyeball and that Monday and Tuesday of the eyeball week will be tear down from the carnival.

**OFFER FROM BALTIMORE AMATEUR RADIO CLUB AND N3WD—**

Anyone who wishes to operate on the early nets on Monday, Tuesday or Wednesday July 29,30,31 will be able to do so at the Baltimore ARC meeting and training facility. Please RSVP with N3WD. The club has 3 stations and will have 2 amps and has a 40 foot tower out back. Directions can be found at BARC's web page at [www.baltarc.com](http://www.baltarc.com) and is 25 minutes from Hanover.

Bill, N3WD

## *Proper Recognition for our Silent Keys.*

In this issue of the Centurion you can not help but notice the loss of life long friends. Ham operators that we have talked with and some have met with over the past 30 years. This year the club has implemented **The Missing Operator** during the start of our nets. It is usual practice that Master Degree Holders, Original Charter Signers and DX Stations start out our lists. Upon notification of a Silent Key, a member of the 3905 Century Club, the NCS will be place the call of the Silent Key at the top of the check in list. At the start of the net the 3905 Century Club will honor the Silent Key by calling their call-sign three times and with no answer check out the call-sign for the final time.

Jay L. Wieland  
Centurion Editor

# STATISTICS

Who makes the 3905 Century Club operate smoothly? Lets take a look inside the operations and day to day operations. From the Desk of the Vice President of the 3905 Century Club.

Fellow net controllers,

For the year of 2007 a total of 1456 points were awarded to 30 stations that acted as NCS. We missed 7 nets total for the year.

Rounding out the top ten were:

WB5FDP 240  
K3QX 200  
N3YK 152  
W8JMF 128  
WA4AQW 126  
K3CD 72  
KI8U 68  
KJ4JC 60  
NJ9T 60  
KC1AU 56  
K6CRA 52

Ok, that is 11 but I don't really count myself as I back fill when needed.

A quick look at the last half of the year showed we had:

Max 105  
Min 22  
Average 56 check-ins per net

Most active stations were:

W5WJN, N3YK, N2XTT, KB3NTJ, W8JMF, NC4RS, K5WSC, KE4DYG, KC8MMZ, N8FEB.

Most active masters were:

N5OHL, NN5G, WB5FDP.

I have lots of stats, and I will collect more for 2008 after carefully reviewing more 2007 data as it becomes available. I plan to contact each of these stations listed above to get comments on what we did right and what we did that could use improvement to make the nets more pleasurable.

I'm a firm believer that input from our members should be a part of the critical process and that should indicate

our future direction.

I would also ask that each of you (especially our top ten NCS) take time to recap what you tried that you feel has improved net operations.

I personally tried a couple of things this year that seems to have been well accepted.

1. I usually give the people that stick around for the whole net a chance to make "as many calls as they need" on the last round. No one leaves until they have worked everyone that they need, or until we run out of time. I find that a few more have stayed instead of disappearing after round one has finished.

2. Make sure the stations that pop up as "direct" are welcomed to the net and that they have the website information so they can learn about the bureau. Also make sure they get a courtesy envelope after 5 stations have contacted them. Most of these people have returned to the net.

3. Tried to have an upbeat attitude and hopefully that came across in my voice. A pleasurable net holds their attention.

I will end this with another great "Thank you" to all that have contributed and made the job of Net Coordinator an easy task. Having a full calendar each month is much less stressful, and we are beginning to attract new stations to act as NCS.

73,  
Rick - WB5FDP
