

The Centurion

Volume 2010, issue 4 October-December, Priceless

Going Mobile

Ah the open road. The Freedom to explore the world we live in. Nothing to hold you back

Except possibly the long coax leading to the 100-foot tower with the stacked tri element beams used to make contact with all your friends around the world.

You've talked to them and you heard so much about the wonderful area they live in you want to see what all the Hub Bub is all about. Not to mention the prospect of gaining the notoriety of being in two or three states at once (or in one case four).

Is it possible to have your cake and eat it too?

WT0A has this to say

"I like it.

Seriously, operating mobile is one of the most fun and satisfying aspects of ham radio and 3905 cc participation.

I love to travel and being able to provide needed contacts for net participants is very

Rewarding. For those who have not tried operating mobile it is not as difficult as

You might think. All that is required is a basic antenna such as a

Ham stick or hustler on a simple mount and a reasonably compact HF

AC7RA Mobile In Canyonlands National Park, Utah

Transceiver. Grounding and bond is the most important part of the

Installation. There are many sites on the web that provide hints and tips.

My most recent trip was to ND to visit my good friend Dwayne KD4POJ and His family. Dwayne and I have logged many miles together over the past

Few years and I wanted to pay him a visit and try to help with his

Antenna upgrade.

On the Way there I was able to make contacts

from the MN/IA/SD tri-point

And Voyageurs NP in MN where I saw many fine examples of their state

Bird, the mosquito.

After a few days of enjoying the Lipscomb hospitality and a visit to the

ND Canada border I stopped at Theodore Roosevelt NP and the MT/WY line.

I stopped to see a long-lost cousin in Rapid City the stopped at Wind

Cave NP and Badlands NP in SD. Last stop was in Pierre, the SD capital

(Apparently a rare one) and headed for home.

On the way I was able to provide a few relatively rare counties for the

County hunters, County hunting is another aspect of ham radio that I

Enjoy and is very challenging.

Sorry that I cannot include pictures for this trip but I forgot the camera."

As you can tell there are many great adventures wait you by branching out, packing up and moving out with your radio mike in hand.

I too have picked up the Bug to operate mobile. Like Glen has mentioned it really is not too difficult to accomplish. I however ended up trying a different approach to going Mobile. I started out just seeing what it was like buying a Ham stick and mounting on my truck taking my Kenwood TS440 from the shack and running a power line to the truck battery. Voila I was mobile. This experiment worked and I was now officially in the Utah capital on the air. The next step was to expand into other bands and take the show on the road. It seemed at first, the best I could do was operate and make contacts

on 40M of course it was the summer months where 40 is at its best (so to speak) I kept trying. We had some vacations planned so I added the radios to the mix and away we went. The National park award was created and that gave the YL an excuse to go on more trips. We were both on board for that one and we planned some trips to the best NP in the nation here in Utah. It wasn't long before I had enough contacts for the nomad award it really wasn't hard. But I was still having trouble getting on 75M but I kept on trying. The next few vacations involved flying across the nation. Hmmm now what can I do? I wouldn't have my own truck where I could mount just about any antenna. I would be limited to a rental car of their choosing. I decided that I would not be actually moving while making contacts so I could use a mag. Mount for the Ham stick. Next was the issue of a power connection. I decided to use the lighter plug. With all the preparations made I headed off to Florida one of our favorite vacation destinations. This first attempt like most experiments did not go too well. With out good ground on the antenna mount adapter I ended up with a lot of RF back into the rig. Also the lighter outlet was limited in the amount of power output. Still I made about a dozen contacts not too bad. What I learned from this experiment was I needed a smaller and lighter Rig and a better antenna mount and another power connection. I purchased a used Icom 706 a small and compact rig that seemed to fit the bill. Next, I found a small lip mount for the ham stick. And finally I found and built a two-wire cable that attached directly to the battery of the car. This time I think I had every thing worked out. The next trip to FL we traveled light and only checked our beach bag (the one I use to pack the antennas) the radio came on the carry on. Checking the TSA website they said Radios did not need to be removed from luggage. Little did I know that Ham radios were considered electronic Equipment and had to go through by itself like all lap tops. Another lesson learned. Finally arriving back in FL the equipment performed well. The band conditions on the other hand did not I still only made a few contacts the only on 40M I was having difficulty with 75M. With a major trip to the north east planned in a couple of months I was beginning to wonder what more I could do to get better results while mobile.

Finally the day came. I had my trusty radio and gear ready to go. Loaded up with my club and special event I headed out. For nearly two weeks I spent my nights sitting in the car eagerly listening to the static and attempting to make calls from the Northeastern part of Our great country. With the help of a few Great stations that help relay for me I was finally able to make many mobile contacts

AC7RA Operating Mobile P.E.I National Park

from two states and 2 Canadian provinces and 2 National parks. I was even able to finally meet one of my good friends Dave, WN1F face to face and he helped me work a few stations on 80M RTTY mobile from his great Mobile Digital Station. I feel that the trip was a success and I have many Great friends in the century club to thank for it. I hope that

Rig Setup in rental car. Notice all the accoutrements necessary for operating mobile

Mobile Contacts

Mobile contacts are a Great benefit to the Club making it possible to complete some of those awards we all love. Even better than that is the opportunity to meet face to face and putting a face to those great mobile operators. Here are some Photos submitted by Donnie

W8EMt operating portable from KG4ZOD's station

KG4ZOD that shows some of his Contacts with some of our mobile operators. I would like to make this an ongoing section of the centurion. If you have any photos and/or stories you would like to share please submit them to AC7RA, centurion editor.

Jesse KF4PAF and Donnie KG4ZOD

Braudie WA4HBQ (Left) Mike W8EMT (right)

The 3905 Century Club has many fine mobile operators. As has been mentioned many of our awards could not be achieved without the love of the hobby and the many hours spent sitting in the drivers seat of a vehicle traveling to and from many remote locations. Some of these locations may not be the best locations to visit, yet they go there anyway, Most of

the time, late into the night. Providing you and I the opportunity of catching some of those rare states or Capital we need for our great awards. If you have any questions or comments about going Mobile the 3905 Century Club members would love to help. Check out our web site WWW.3905ccn.com

"WHAT'S IN THE BOX" CONTEST

The What's in the box contest is still underway. There are still plenty of opportunities to enter and win. This is a great time to go through your cards and apply for awards

The object of the "What's in the Box" Contest is to file and have approved as many awards as possible by 28-Feb-2011. The awards listings on the WB5FDP Website will be considered the official source for the number of awards earned during the contest period.

The "What's in the Box" Contest started 1-Sep-2010 and will end 28-Feb-2011. You will be automatically entered in the contest once for each approved award you earn (including endorsements) dated within this time frame. Any ties will be shared pro rata among the respective parties.

New Master
56

We would like to congratulate Cliff Davis for earning this prestigious Award
I do not have any Background information at this time but I hope to have something for the next Issue
please stay tuned.

New Master 57

Craig McLoughlin

Like many others, I became interested in radio when I was a child. I was on vacation with my parents. My uncle came to visit and he had a new set of walkie-talkies which, of course, my brother and I offered to test for him. During our extensive testing, that involved crawling around in the long grass, one of the antennas got broken. During my repeated apologies, all I could think of was how neat it was to be hundreds of feet away from my brother and yet still be able to communicate with him. This lead to CB radios when I was in grade school. In high school, my interest in electronics and communications peaked and after high school I entered an Electronics Engineering Technology college program. It was during the second year at college in 1983 when I first became licensed as VO2AM operating portable in VE3. For several years I was very active operating in VO2, VO1, and VE3. I operated mostly HF SSB with a little CW but in the late 80s became very involved with work and other interests. In the late 90s I became a little more settled and my interest in radio again ignited and I have enjoyed the hobby off and on since then.

In October 2008, I was tuning around the bands and came across the 3905 Century Club Net. I had to look at the radio dial a couple of times because I was on 3.902 but everybody kept calling it the 3905 Net?? After listening for about half an hour, I decided to check in and what a delight ... I was considered "DX". Well after that night I was hooked and if you don't believe me, just ask my wife. I think she was starting to worry about me because we would come home from work, have supper and then I would disappear to the shack for hours.

The first contact I made was with K7PGL on October 4, 2008. I made 10 contacts that night and everybody welcomed me with encouragement. Since then there were many, many, many check-ins and contacts as I worked toward various awards listed on the CCN web site. Originally, I looked at the requirements for a Masters Award and became overwhelmed. After one of these early nets, I listening to a Master (WB5FDP ... I think) explain the best approach was to obtain the 100 Point Award but then start

filling in the 2K Award, then 1K Award and finally the 500 Point Award applications. In taking this approach, you would not inadvertently use (waste) a difficult state on the 500 Point Award. Hey that makes sense. This guy must know what he's talking about. The last contact I needed was a DX contact on 75M SSB and this came when I worked PJ7UQ on July 3, 2010 for my 4798th contact. The Poker Player Award was also difficult and thank to KI4WCQ for bringing WV0U to the net.

When it comes to thanking folks, I am not sure where to start or end. There are so many truly wonderful people out there and I feel very grateful to be part of the Century Club. I do want to thank the Bureau managers Richard, Gene and Ron. 5000 contacts means 10,000 cards processed WOW super job guys. Also to all the Net Control Stations thanks for all your time and dedication; there could not be a net without an NCS. AI (VE4ABU) thanks for all the guidance and quick processing of the award applications and NC4RS as Award Secretary. To all the mobiles you guys make those elusive states a lot easier. Finally, thanks to all the relay stations. (W4NNO, K0HNM, K5SVC, KC0MS to list a few). You could hear me when nobody else could.

I have certainly enjoyed the last couple of years and look forward to many more.

de VE3CMB (Master #57)

New Master 58

Lee George

Lee George proudly showing off his Masters award
(notice the Phaser on his desk?)

There has been in the past lots of talk about how easy it is to get the Masters award today as opposed to days gone by. Having not tried to get the highest award our club offers in the ‘good ‘ol days’ I can not answer to that. What I can answer to is the feeling you get when you open your mail box and realize the award has finally arrived!

While not having to walk up hill in the snow both ways to the shack to work far and distant stations, I did have to walk down stairs. I did have to be on the net night after night into the wee hours to get that last call. I did have to learn how to do RTTY, PSK and CW. Know that it is a great feeling when you look at the live logger and see all red on a CW net.

I did have to struggle with getting operators to send that card that was lost or forgotten. Coach stations in the way the CCN nets are run and hope that

those direct contacts that were just “kicking the tires” sends the card as they promised. I did fight the butterflies of running a net while, at the same time learning how to be a Net Control Station while ‘on the job’.

The idea of setting a goal in your life and seeing it come full circle is truly a great thing. My goals as of late are not the same ones that I had in my younger years. Some of those goals that were geared towards finding someone to grow old with. Raising a few kids and making the best of what this old world deals you. To currently fighting the obvious and not so obvious set backs that only an amputee and burn victim will experience.

However, I’m not going to bore you with tails of physical therapy nightmares. No, I’m here first and foremost to thank my wife, Tracey. She has stood beside me and ‘allowed’ me to spend those

countless hours working towards this goal. How she jokingly (?) refers to the radio as, 'the other woman' in my life. To my twin girls that can recite KE4VYN, 5X9 and 'back to net' as well as any seasoned operator, although it is under their breath and out of my earshot!

While I could list lots of calls of the people that directly helped me stay the course, relayed my signal, put up with me while I made one last call or strained their ears pulling my signal out of the mud. Those that I also owe speakers replacements too after a station upgrade.

Yet the fact is every contact that I used in an award I owe a thank you too, because without every single one I would not have everything I needed to reach the this esteemed award.

With that I extend my heart filled thanks and appreciation to all stations for being there, to those Masters that inspired and came before me and to the ones after that will carry on our traditions.
KEEP GOING AND HAVE FUN!!

73,

Lee George KE4VYN

Election 2011

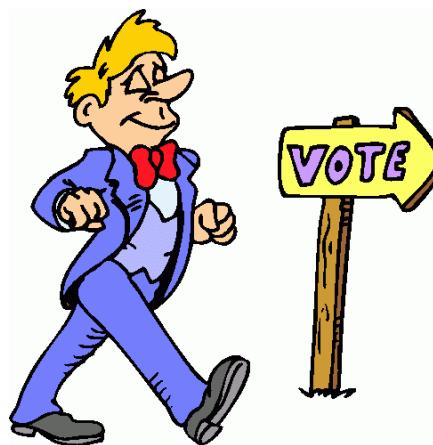

This year we will be electing the odd-Area Directors, DX Area Director, and the club's Vice President. These positions all carry a two-year term and all newly elected officers will begin their terms on March 1st, 2011.

Balloting will begin on December 15, 2010 and will run until January 15, 2011. Balloting will be via our Club Web Site or via postal mail to our Club President. The web page address for on-line balloting will be announced on December 15, 2010. There will be a final opportunity to vote on the air on January 30, 2011.

Results of the election will be announced at the conclusion of the on-air vote on January 30, 2011.

To vote, you must provide your call sign, your 100-Point Certificate number, and the band/mode on which it is held.

We have many great individuals that are there to help and guide this great club. Please take time to look over the ballot and vote for the person who think will best represent you in you call area and for the club in general.

Editors corner

I would like to say thanks for this opportunity to bring you the latest news from this great club. NC4RS Ronnie Stanley has done a terrific job on past newsletters and has set the bar high in what to expect in the Centurion. I hope I can fill the shoes and provide you with the same fantastic information we have had in the past. In order to do so I will need the help from the membership of the 3905 century club.

I need Ideas of what you would like to see in the Centurion. I also need comments, suggestions and articles. You can mail them to me, my address is on QRZ.com you can email me rick@theasper.net or ac7ra@yahoo.com I hope to get some feedback so I can continue to make the Centurion a fun and exciting newsletter.

E-mail Reflectors

Our e-mail reflectors have been a big help and make the nets run smoothly .

3905 Checkins : While on the net follow along with the check in list 3905 Chat Group : General discussion and Club information 3905 Award Talk : Q&A of awards . Hamtown : General Friendly chat (fun but clean please) also check in list for each net . If you want to use links to signups for each of the groups, here they are...

3905Chatgp <http://groups.yahoo.com/group/3905chatgp/>
3905Checkins <http://groups.yahoo.com/group/3905checkins/> 3905AwdTalk <http://groups.yahoo.com/group/3905AwdTalk/> Hamtown <http://groups.yahoo.com/group/HamTown/>

You will have to subscribe and be approved for each you would like to join .

Suggestions

If you have an idea or a suggestion that you would like to see implemented by our club let me know and I'll get it to the right person in our club that can handle the request .

E-mail me at : rick@theasper.net or ac7ra@yahoo.com

The 3905 Century Club, Inc. Is an International Amateur Radio Club incorporated in the state of Florida since February 1977. Its purpose is to assist hams both foreign and domestic in obtaining Worked all States awards. We have nets on 20,40,75,80, and 160 meters operating a mixture of SSB, CW , RTTY and PSK-31 modes . The Club offers many fine certificates for contacts made on its nets .

www.3905ccn.com

Jim Higgins , KB3PU is the Web Master of our web page . I know we all appreciate the work he is doing with it and the hours he has invested keeping it up to date for us .
